

SMARTPHONE BYOD AND GUEST WIRELESS

Managing People and Technology Together

INTRODUCTION

A global pharmaceutical company was seeking to implement a pilot Bring Your Own Device (BYOD) Policy for a newly released smartphone. Also required was creation of a Guest Wireless Access Policy for visitors' personally owned tablets and laptops.

OBJECTIVE & SOLUTION

Creation of a policy to allow employees and contractors to connect an iPhone 5 personally owned device to the corporate network for synchronization of email, calendar and contacts.

Creation of a policy to allow temporary access of a sponsored visitor's tablet or laptop to the corporate guest wireless network.

Alignment of policies to include acceptable use, and user acknowledgement and agreement to the terms of service and usage for these personally owned devices.

Utilization of emerging industry best practices, as well as VerisVisalign experience in this area to create the deliverables.

Project Management was used to coordinate:

- Representation from Executive Management, Human Resources, Legal, IT Security, IT Support and Corporate Communications
- Facilitation of team to develop policies and agreements

SERVICES

- Policy development
- Best practices
- Project Management

RESULTS

- Creation and rollout of a global policy
- Satisfaction of required deliverables

Utilization of emerging industry best practices and VerisVisalign BYOD experience.

WHAT MADE THE DIFFERENCE?

- Subject Matter Expertise
- Facilitation and collaboration with team
- Executive sponsorship
