

GLOBAL BYOD POLICY DEVELOPMENT

Managing People and Technology Together

INTRODUCTION

A global pharmaceutical company was seeking to implement a Bring Your Own Device (BYOD) Policy for smartphone, tablet and personal computing platforms.

OBJECTIVE & SOLUTION

Create a global Bring Your Own Device (BYOD) Policy which defined accepted business practices and user responsibilities for the use of personally owned devices on the corporate network. This policy was to define the acceptable use, compliance, eligibility, and enrollment requirements for the secure use of a personally owned device accessing enterprise information assets. Policy to also provide corporate reimbursement and support guidelines and standards.

Approach:

- Creation of a client cross-sector, cross-functional team to assist VerisVisalign with policy development
- VerisVisalign assigned Senior Process Consultant to lead the initiative
- Representation from client Human Resources, Legal, Finance, IT, Compliance and Security organizations
- Assignment of Policy Area Leads for areas of Acceptable Use, Compliance, Eligibility, Enrollment, Lost-Stolen-Damaged-Compromised, Reimbursement, IT Security and IT Support

- Facilitation of work sessions with Policy Area Leads to develop a device agnostic approach to BYOD
- Policy Area Leads responsible for determination of geographic considerations and exceptions

SERVICES

- Policy development and best practices
- Process Management and Project Management

Creation of a global policy template to assist in geographic customization and acceptance.

RESULTS

- Creation of a global policy template, with content, for geographic customization and acceptance

WHAT MADE THE DIFFERENCE?

- Subject Matter Expertise
- Facilitation and collaboration with cross functional teams
- Senior Consultant Leadership and Experience
